Custom Homes Builder Realizes Significant Time Savings by Digitizing Forms and Automating Reports

INDUSTRY

Construction

CUSTOMER SINCE

March 2016

FORMS

- Roofing Agreements
- Sales Forms
- Site Safety Forms

At-A-Glance

Challenge

Needed a digital solution to host a variety of forms used by their largely mobile workforce, that would simplify their client facing processes, while remaining familiar and easy to use.

Solution

Used GoFormz Mobile forms to digitize their forms, allowing the Bartlett Homes team to quickly capture signatures and approvals, without running back and forth from the office (no more faxing, scanning or manually entering data).

Results

- Eliminated the need to deliver, collect and accumulate overwhelming amounts of paper forms – saving time, and reducing costly obstacles to productivity.
- Provided management with clear, scheduled reporting on collected data – delivering real time insights into sales metrics and project progress.
- Automated the documentation process, eliminating the need to travel back and forth to the office to scan, copy or fax documents. Saved significant time, and money

Why GoFormz

"I came across a lot of different companies that I had to create my form from scratch on their website, or if I uploaded the PDF it was difficult to get the form to fill in where I needed them to. When you deal with so many people in an office, I had to find a solution that would make it easy for even the 'non-technology people'." —

Jeramie Kramer

About Bartlett Homes & Roofing

Bartlett Homes & Roofing has designed and built custom homes in the Treasure Valley of Idaho for 25 years. The talented Bartlett Homes team focuses on providing custom, high quality services “from roof to floor” — maintaining the design and build of homes, as well as various roofing crews throughout the area. Providing expert, specialized care for various housing projects simultaneously requires the Bartlett Homes team to strike a balance between efficiency and attention to detail, a difficult task. As multitasking specialists from “Roof to Floor,” Bartlett Homes needed a digital solution that owned and streamlined their process from start to finish — enter, GoFormz.

The Full Story

As the Bartlett Homes collection of forms and documents grew, Jeramie Kramer, Roofing Specialist at Bartlett Homes, recognized it was time to adopt a digital solution to traditional paper work. Their current process was extensive, requiring clients to sign various forms, and Bartlett representatives to complete thorough documentation of each agreement. In addition to completing paperwork, representatives would also provide customers with copies of agreements, requiring team members to commute back to the office to copy forms, and then revisit the customer's location to finally deliver their documents. This process was costly and unsustainable. "I was carrying around staples with me every day, for all the paperwork that we had to do," Jeramie explained. "It was very complicated, and very confusing, which is why I started looking for a solution to minimize the forms and paperwork."

Throughout his research, Jeramie came across several mobile form platforms that didn't fit the bill. Bartlett Homes needed an easy to launch platform that would streamline client documentation

and form creation, that the entire staff (even the less tech-savvy) would be able to easily use. Upon finding GoFormz, Jeramie used his free trial account to digitize their most popular form, the Roofing Agreement, and was very happy with the simplicity and versatility of the user interface and form completion process.

After completing his trial and implementing GoFormz, Jeramie expanded the Roofing Agreement to encompass more detail within one form, effectively reducing the need for additional client facing paperwork or repeat visits. Now Bartlett Homes is bolstering their GoFormz collection to include mobile safety assurance forms – allowing Bartlett homes representatives to visit job sites and capture vital safety and quality assurance details and images (e.g. ensuring employees are wearing harnesses, and including pictures of project details).

Before implementing GoFormz, a large amount of time was spent transporting documents. "There's a lot of time spent driving back and forth to deliver documents, to pick up documents, to copy documents." With GoFormz mobile forms and documents, Bartlett

Homes customers and team members are immediately emailed a copy of completed forms upon submission, eliminating the need to travel back to the office to scan, copy or fax documents. Saving significant time, and money.

Jeramie also frequently utilizes GoFormz reports for weekly or daily scheduled reports, allowing for insightful, real-time coverage and tracking of sales metrics and project progress. The best part? Reports are automatically emailed to Jeramie — no reminders or extra time necessary.

"Right now I have a report for our roofing contracts. So every morning at 7am I get an email that is date specific, that I can go through and look and see if we had any more sales from the day before. And every Monday I pull a report that I use in my sales meeting, tracking what happened during the week before." — Jeramie Kramer

Since adopting GoFormz, Bartlett Homes & Roofing has saved a large amount of time and money, Jeramie estimates about ten hours a week per user. "I can take those extra ten hours I saved with GoFormz and make another two or three sales throughout the week." Considering the time it previously took to copy paperwork and run documents to the office and back to customers, having a mobile solution that instantaneously delivers and automates the process was a great help.

"It's so simple." - Jeramie Kramer

With dramatic time savings and client facing improvements, Bartlett Homes & Roofing is well on their way to becoming an example of modern efficiency. Excited with their progress and initial success, Bartlett Homes is working to expand their GoFormz collection, and further enrich their forms with powerful features and logic.
